

2nd FLNG Tech Asia Summit 2008

Maximising Resources

Organised by: **Hydrocarbon Asia**

Preliminary Call for Papers

November 2009, Jakarta, Indonesia

The **2nd FLNG Tech. Asia Summit 2009, Maximising Resources** is a result of our market research and commitment to the prevailing LNG scene in Asia and the development to tap into existing resources by deploying the intrepid FLNG vessel. The conference has been specifically designed to address a series of critical issues ranging from escalating operational costs, pricing issues and the future of FLNG. As the demand for natural gas increases over time and limited number of large gas fields, the only method of producing and offloading natural gas, other than through pipelines, is with the FLNG vessel.

John A Sheffield from John M Campbell and Company, UK has kindly consented to deliver the Opening Keynote Address at the conference.

This conference in addition to highlighting the technology involved will also discuss the problems and solutions in the liquefaction processes. With the LNG industry nearing its zenith, it is a certainty that the strategies which can be implemented today will determine the survival of your business tomorrow. This inaugural **2nd FLNG Asia Summit 2009, Maximising Resources** conference, will bring together industry proponents who will share with you their valuable insights and provide innovative solutions to both commercial and operational issues faced by the industry today.

The Conference will also focus on the cardinal issues of regional markets, price relativities between oil and LNG, small/medium scale maritime LNG logistic chains and local distribution in the Asia Pacific region. The fulcrum of the Conference will be on parameters followed by the key regulatory bodies in the market prevailing on a precise and transparent methodology to assess the pricing of natural gas, emissions, transportation and the driving factors for the Asian markets.

We invite proposals for papers that enable the FLNG/LNG/GTL/CNG companies, suppliers and manufacturers in the Gas industry to pool their knowledge and experiences in the following areas:

Papers to be presented should be in line with the following topics:

• **FLNG construction and technology** • **Gas Processing Technology LNG, GTL, CNG and their impact in the Asian Oil And Gas industry** • **Primary concerns in Asian LNG pricing** • **Concepts of Offshore Production of LNG** • **Innovations and impediments in Offshore liquefaction** • **Environmental and safety concerns in the process of LNG** • **Regasification terminals for Standard LNG Carriers** • **Manpower deployment on FLNG vessels and operations** • **The future of FLNG in Asia**

The author should submit an abstract of not more than **400 words** in **MS Word** format and should state clearly the objectives, subject matter and conclusions to be presented in the full paper. The abstract **should be accompanied by the author's bio data(s)** (<100 words) and photo(s). Abstracts of papers on any of the topics mentioned above are being actively solicited although other topics of equal interest will also be considered. Companies who wish to share their experience/knowledge in the development projects are invited to provide an abstract of their paper for consideration by the Programme Committee.

Abstracts submission – Deadline 29 August 2009
Notification to selected authors – 5 September 2009
Final papers submission deadline – 26 September 2009

If you wish to present a paper at the **2nd FLNG Tech Asia Summit 2009**, you may send your abstract, biodata & photo(in colour) either online or by email to: siva@safan.com or zaman@safan.com

To view the guidelines for paper presentation, please visit our website: **www.safan.com**

For further information, please contact Zaman - **zaman@safan.com** or Siva - **siva@safan.com** or call (65) 6222 3422

Note: Papers of a commercial nature will NOT be accepted by the members of the Technical Program Committee.

Speaker benefit: For the benefit of the industry, selected papers will be published in Hydrocarbon Asia and posted on our website.

Speaker's Registration

I wish to present a paper on:

My particulars are:

Salutation: Mr Ms Dr

Full Name (underline surname) : _____

Job Title: _____ Company: _____

Address: _____

City State: _____ Zip: _____ Country: _____

Phone: _____ Fax: _____ Email: _____

Conference Paper (Abstract) Submission

I would like to present a paper at the **2nd FLNG Tech Asia Summit 2009**.

My contact details and the abstract of my paper are as below for submission to the Conference Programme Committee.

Submit below your abstract (400 words), bio data (100 words) and your photograph.

Note: Your bio-data and photograph should accompany this submission of the abstract which will facilitate producing conference promotional material and publication of your paper in Hydrocarbon Asia and on our website: **www.safan.com**
